Bill Adams  
U.S. Environmental Protection Agency  
RCRA Compliance Section HW-112  
1200 Sixth Ave.  
Seattle, WA 98101

Dear Bill:

Thanks very much for hosting the meeting yesterday to clarify for me the mysteries of the RCRA process as it relates to the Port's property at Terminal 91 which is leased by CHEMPRO. The meeting was quite informative and answered most of my questions satisfactorily.

I want to confirm my request of yesterday that the Port, as owner of the property, be included in all further actions relating to the Section 3013 process and any additional actions which might follow from it. In this regard, I would appreciate receiving copies of all correspondence, being invited to any meetings, and learning of any other communications regarding this matter. Further, we would like the opportunity to review and comment on any proposed actions or decisions, study plans or reports, and the like. For starters, I would like to receive a copy of the latest study plan which was discussed at the meeting yesterday, and which you have evidently agreed to.

I appreciate your cooperation in this matter. If you want to reach me, I am at 728-3190.

Sincerely,

David A. Aggerholm  
Manager, Environmental Management
